

PILLAR

2. "Decompression visualization: creating space between vertebrae, therapeutic mechanism"

Vestibular System

1. "Balance testing equipment: examining vestibular function with cervical component, integrated assessment"
2. "Inner ear-neck connection: anatomical diagram showing neurological pathways, system integration"

Video Analysis

1. "Multi-camera setup: recording positions from various angles, technique documentation"
2. "Movement analysis software: skeletal tracking during exercises, objective assessment"

Visceral Effects

1. "Theoretical organ mapping: proposed spine-organ connections, unvalidated hypothesis"
2. "Research gap visualization: missing studies for visceral claims, evidence needed"

Visual Performance

1. "Athletic eye tracking: improved visual focus with better posture, performance enhancement"
2. "Posture-vision test setup: measuring visual acuity in different positions, integration research"

Volume Parameters

1. "Optimal dosage chart: frequency and duration recommendations, evidence-based prescription"
2. "Dose-response curve: outcomes related to practice volume, optimization research"

Voyer, Guy

1. "Historical timeline: Dr. Voyer's career and technique development over 35 years, founder recognition"
2. "Original teaching photo: vintage image of early instruction methods, historical documentation"

W

Walking Patterns

1. "Gait analysis lab: pre/post intervention showing improved stride mechanics, functional outcome"
